Hello,

I've been re-testing something.

I have prepared a new report. Dragged five text boxes onto the report band.

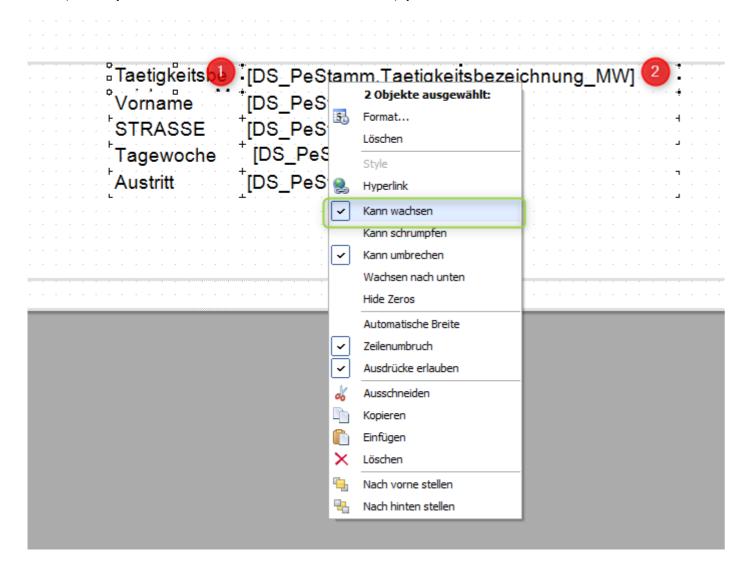

No changes were made to the text boxes, only the caption fields were moved to the data band.

The preview is okay, the field "Austritt" is empty.

Then I set the attribute "CanGrow" to true for the first two textboxes.

In the preview you can now see the field which should be empty.

Preview, the Field "Austritt", hast the Fieldname
